## SKILLS

Ruby on Rails Hotwire Turbo Stimulus TypeScript JavaScript PostgreSQL MySQL Redis  
Sidekiq Node.js Git Linux Database Design API Design REST APIs Microservices DevOps  
Docker Kubernetes AWS GCP

## EXPERIENCE

### Senior Software Engineer

Visa Inc., Remote

March 2025 — September 2026

- worked within the core Payments team, diagnosing, debugging, and resolving complex transaction failures to maintain high platform uptime and reliability (99.9%+ *uptime*)
- integrated Enterprise Single Sign-On (SSO) authentication mechanisms into existing web applications across Visa's infrastructure (10+ *applications*)
- enhanced web security compliance, access control, and user identity management across corporate environments (1,000+ *users*)

### Senior Software Engineer (B4B Payments)

Payment Card Solutions Ltd., London, UK (remotely)

May 2022 — March 2025

- architected and developed a dedicated compliance microservice for automated sanction screening and risk mitigation across all transactions
- contributed to core payment processing infrastructure, ensuring high reliability and transaction processing standards (\$100M+ *annual volume*)
- designed secure RESTful APIs to integrate internal financial microservices with third-party banking providers

### Senior Software Engineer

Triage Inc., Ottawa, Canada (remotely)

October 2018 — April 2022

- developed a data exploration and analysis tool to efficiently manage over 2 TB of AI training data
- streamlined storage and processing of 2M images by migrating to *ActiveStorage*

- redesigned [API](#) to align with a wizard-like [UI](#) for 200K customers, simplifying the interface and reducing endpoint count
- rapidly built a skin condition classification tool for 20 dermatologists and a team of [GPs](#), leveraging *Metabase* for accelerated delivery
- optimized staging and production environments seamlessly migrating them out of Kubernetes clusters, deployed with Kamal, resulted in threefold cost reduction

## Senior Software Engineer

Freeletics GmbH, Munich, Germany (remotely)

July 2014 — September 2018

- migrated legacy *PHP*-based infrastructure to *Ruby on Rails*, streamlining the tech stack and improving maintainability
- optimized the build process for an *Angular* application, reducing build time tenfold and significantly accelerating development
- designed and implemented a token-based authentication mechanism, introducing access tokens that enabled the extraction of the authentication service and modularization of the *Rails* application
- broke down a monolithic *Rails* application into multiple services ([APIs](#)), allowing for separate release cycles for distinct applications (Freeletics Fitness, Freeletics Nutrition, etc.)

## Senior Software Engineer

Quickjack Solutions Inc., Ottawa, Canada (remotely)

October 2012 — June 2014

- developed the [Canadian Health Registry Database](#) — a *Ruby on Rails* and *Angular*-based platform that processed nearly \$2M in fees for the client
- built a bilingual spatial data visualization tool for [Search and Rescue Canada](#) — a single-page application (*Ember*, *Leaflet*, *D3*, *Crossfilter*) enabling in-browser visualization and filtering of 100MB+ *ArcGIS* datasets without server-side code

## Senior Software Engineer

Tiramizoo GmbH, Munich, Germany (remotely)

October 2011 — September 2012

- designed and developed a highly modular [API](#) using *Node.js*, deploying it into production, later rewritten to *Ruby on Rails*
- implemented an abstraction layer to enable switching from Google Directions [API](#) to alternative providers, resulting in substantial cost savings for the company

## JavaScript Developer

Strobe Inc., San Francisco, USA (remotely)

June 2011 — September 2011

- collaborated with a remarkable team, including Yehuda Katz, Carl Lerche, José Valim, Peter Wagenet, Piotr Sarnacki, and others
- developed a social add-on for the Strobe platform that simplified integration with Twitter and Facebook [APIs](#), enhancing the platform's functionality and user experience

## OPEN SOURCE

- [s3 gem](#) - developed a Ruby library to access European S3 buckets, with over 3 million downloads

- [vcard gem](#) - extracted vCard support from the unmaintained vpim gem, downloaded over 2 million times
- sqlite3 gem - initiated a new sqlite3 library addressing Ruby 1.9 compatibility and character encodings via FFI bindings
- co-founded the [Silesian Ruby Users Group](#), organizing over 30 meetups

## EDUCATION

### **MSc in Computer Science**

Silesian University of Technology, Gliwice, Poland

*2004 — 2009*

## LANGUAGES

- Polish (native)
- English (fluent)
- Spanish (basic)
- German (beginner)
